

TO OUR CUSTOMERS: Barco Industries, Inc., a member of The Phoenix Forge Group, offers you a line of well-respected products. Many of our striking tools are forged in Pennsylvania, then heat treated, finished, and assembled at Barco. This combination of prime manufacturing resources enables Barco to provide you quality, cost competitive striking tools. Barco trowels and masonry tools are fabricated utilizing high volume manufacturing methods. Our manufacturing strengths are reinforced by the strong, positive, dedicated work ethic of our Pennsylvania heritage. Barco and all Phoenix Forge Group employees believe in hard work, quality products, and high levels of service as indicated by our quality statement.

The Phoenix Forge Group is committed to meeting customer and industry requirements while continually improving our quality management system.

Please review this catalog for our current offerings, and contact our customer service department for prompt service and sales assistance. Thank you.

BARCO WARRANTY

If any BARCO hand tool does not perform under normal usage because of workmanship or imperfection, BARCO Industries, Inc. will replace it free of charge. Simply return to any dealer selling BARCO tools, for replacement. However, wood handles, by their very nature, are subject to wear and breakage though normal use, therefore are not guaranteed against breakage by BARCO.

LIGHT DUTY® TOOLS

Intended for the occasional user and primarily for light duty household jobs, these tools are a good value for the budget conscious homeowner.

SAFETY NOTE: Light duty tools are intended for light use only. They may chip if used improperly for striking surfaces as hard or harder than theirs. Avoid striking other hammers, cold chisels, or masonry nails with these products. Also avoid striking with a glancing blow. Safety goggles should be worn at all times.

BARS

Wrecking Bars are used for prying apart wood or pulling nails. The Handi-Bar is used for a variety of jobs including the removal of shingles and the pulling of nails. Crow Bars are used primarily for splitting or separating wood, concrete forms or metal. They have two types of points, pinch and wedge. The Digging Bar features a tamper top for better control and force. It is especially useful in the removal of rocks.

BRICK HAMMERS

Designed for setting and breaking bricks, masonry tile, concrete blocks, and for chipping mortar from bricks, all BARCO brick hammers have extended necks for proper clearance in tapping bricks while leveling. Rocket® brick hammers feature a cushioned steel handle for strength, balance, and reduction in fatigue. Fiberglass handles offer a cushioned grip, which provides increased shock absorption and reduction in fatigue. Commercial/Industrial hammer features a select hickory handle for strength and durability.

BALL PEEN HAMMERS

These hammers have forged high carbon steel heads and are designed for striking cold chisels in cutting or shipping work and metal forming. The ball shaped peen is used for metal forming. Some models feature a cushioned fiberglass handle, which provides secure grip, added shock absorption, and a reduction in fatigue. Others feature a select hickory handle, the strongest and most durable handle.

SAFETY NOTE: The striking face should be twice the size of the chisel or punch being struck.

All Purpose Dolly

0725100

Designed as a heavy duty general purpose dolly especially suited to heavy gauge fenders.

Wedge Dolly

0725200

The long slender shape is preferred by many repairmen for general purpose work. The long, thin lip is useful when used on reinforced areas.

Heel Dolly

0725300

This design makes it possible to reach easily into sharp corners with wide radii.

Universal Dolly

0725400

Excellent for holding during heavy repair work. Also, the different crowned working faces, with two beading and flange lips, provide good general use features.

NOTCHED TROWELS

A notched trowel is used to apply various types of mastic, cement, or adhesive. These trowels are designed with the homeowner in mind with the quality to get the job done, yet reasonably priced for the one-time user. These same aspects appeal to the contractor who uses “throwaway” grade tools.

MARGIN, POINTING, BRICK, AND PLASTERING TROWELS

Margin trowels are used to contour corners and hard to reach square areas in concrete finishing and mastic applications. Pointing trowels are used for tight areas, finishing off edges and mortar work. Brick trowels are used to lay mortar in place for brick or stonework. Plastering trowels are used to spread and finish plaster or cement. These trowels are constructed to meet the quality needs of the homeowner or as a “throwaway” grade for contractors.
